Summary

Third-year CS student at MS University Baroda building production-grade platforms independently. Built **InterviewOS** (WebRTC + Y.js CRDT collaborative interview platform), **Outly** (GPT-4 career automation + Gmail API + Redis queue), and **Bookstage** (ASP.NET Core ticket booking + seat locking engine). Ex-intern at YV Thinkers. Strong in clean architecture, SOLID principles, REST APIs, and real-time systems.

Experience

Software Development Intern | YV Thinkers, Onsite
MERN | REST APIs | JWT | MongoDB

Jul 2023 – Sep 2023

- Built **full-stack CRM** using MERN stack for Admin and Customer-facing workflows — designed **scalable REST APIs** for order tracking, data management, and admin controls handling concurrent requests.
- Implemented **role-based JWT authentication** with dual-token strategy and applied **SOLID principles** with clean architecture — fully reviewable and maintainable by a team.
- Automated customer record lifecycle via **MongoDB aggregation pipelines** — reducing manual data entry by ~70% across core CRM workflows.

Projects

InterviewOS — Real-Time Interview Platform

Nov 2025 – Present

React.js, Node.js, MongoDB, WebRTC, Socket.IO, Y.js, Judge0, Monaco Editor

- Architected **scalable real-time platform** — **WebRTC P2P** video, Y.js CRDT collaborative editor, shared whiteboard, and room-scoped Socket.IO isolation for concurrent interview sessions.
- Integrated **Judge0 API** for sandboxed code execution across 7 languages in Monaco Editor + built **proctoring system** (tab-switch, paste prevention, 3-strike termination) — no third-party SDK.

Outly — AI-Powered Career Automation

Jan 2026 – Present

React.js, Node.js, Gmail API, Redis, Bull Queue, GPT-4, OAuth 2.0

- Built **end-to-end LLM pipeline** — GPT-4 researches companies from CSV and generates unique cold emails, auto-saved as Gmail drafts via **Gmail API + OAuth 2.0 + AI Resume Tailor** scoring JD compatibility.
- Implemented **Bull + Redis distributed job queue** with rate-limiting and fault-tolerant execution + **AI content scheduler** for LinkedIn & Twitter via Telegram Bot.

Bookstage — Full-Stack Ticket Booking

Feb 2026 – Apr 2026

React.js, ASP.NET Core, SQL Server, Docker, JWT, REST API

- Built **end-to-end booking platform** — movie/event/sports discovery, seat selection, and **QR ticket confirmation** with PDF download.
- Engineered **seat locking engine** (5-min expiry, auto-cleanup) + **modular REST API** across 10+ modules with JWT auth and Dockerized deployment.

Education

Bachelor of Engineering in Computer Science & Engineering

2024 – 2027

The Maharaja Sayajirao University of Baroda, Vadodara

Expected Graduation: May 2027

Diploma in Computer Engineering

2021 – 2024

(GTU) Government Polytechnic, Jamnagar

CGPA: 7.51

Technical Skills

Languages: JavaScript, Java, Python, SQL, C#

Web & Frameworks: React.js, Node.js, Express.js, ASP.NET Core, REST APIs, Socket.IO, WebRTC

Databases: MongoDB, PostgreSQL, MySQL, Redis, SQL Server

AI & APIs: GPT-4, Groq API, Judge0, Gmail API, OAuth 2.0, JWT

DevOps & Tools: Git, GitHub, Docker, Postman, CI/CD, Bull Queue

CS Fundamentals: DSA, SOLID Principles, Clean Architecture, OOP, System Design (basics)
